1. Determine the configurations that need powered and electrical load requirements 2. Determine Starter Harness length and location 3. Establish placement of Power Blocks. 4. Identify Receptacles per Power Block. 5. To figure harness length, take the center of the item where the Power Blocks are to be placed plus the length of any items the harness needs to pass under subtract 7" and use the next larger size harness, unless measurement is exactly the size of a harness.
6 . Determine needed accessories.

## TENNSCO"' Lockers

Tennsco lockers are built to be durable and quiet. Heavy-gauge steel doors on single-tier and double-tier lockers are designed with door stiffeners, cushioned locking channels, rubber bumpers, and an ultra-smooth latching mechanism which work together to reduce noise and improve door operations.

Box Lockers are ideal for securely storing smaller items like purses, lunches, books, and athletic gear. The efficient six tier configurations give schools, clubs, and hospitals the necessary storage capabilities without taking up valuable floor space.

Single and Double Tier lockers are roomy enough for just about any secure storage application. Single Tier are our most popular general purpose locker. Double Tier Lockers give you twice as many lockers in the same space as single tier, yet providing plenty of hanging room for shirts and jackets.
